NOTICE OF PUBLIC HEARING
concerning

**TENTATIVE ORDER AMENDING
WASTE DISCHARGE REQUIREMENTS ORDER NO. R5-2007-0031
(NPDES NO. CA0085201)**

FOR

**CITY OF ANGELS
CITY OF ANGELS WASTEWATER TREATMENT PLANT
CALAVERAS COUNTY**

The Regional Water Quality Control Board, Central Valley Region, (Regional Water Board) adopted Waste Discharge Requirements Order No. R5-2007-0031 on 3 May 2007, for the City of Angels Wastewater Treatment Plant (Facility), Calaveras County. The City of Angels maximizes disposal of treated wastewater to land via spray irrigation of 61 acres of pastureland and reclamation of 110 acres on the Greenhorn Creek Golf Course. Wastewater flows exceeding the land disposal and storage capacity of the Facility are to be discharged seasonally to Angels Creek. The Facility is permitted to discharge seasonally up to an average daily flow of 1.9 million gallons per day of tertiary treated wastewater to Angels Creek, a water of the United States.

Since adoption of Order No. R5-2007-0031, the City of Angels provided a mixing zone study that demonstrates that assimilative capacity and dilution is available in the receiving water. The Regional Water Board will consider adoption of an Order amending Order No. R5 2007-0031 to allow dilution credits for compliance with human health and aquatic toxicity criteria. The allowance of dilution credits results in changes to the water quality-based effluent limitations for ammonia, bis(2-chloroethyl)ether, dichlorobromomethane, copper, lead, and zinc, and the numeric whole effluent toxicity monitoring trigger. Other associated changes are made throughout the permit and fact sheet, due to the allowance of dilution credits.

A public hearing concerning this matter will be held during the Regional Water Board meeting, which is scheduled for:
